

Q

Last month, you mentioned you're working on decreasing the running+shooting accuracy, can you update us on the progress or what you are looking to adjust?

A

We have some changes planned for Patch 2.02 that should help address sentiment on running accuracy with rifles. Keep in mind, we're making sure not to change too many systems at once to ensure that shooting doesn't feel so dramatically different that you'll have to relearn habits. As always, we'll keep an eye on the change and will continue to adjust as necessary.
